

Laboratory Testing

The laboratory tests doctors prescribe for us serve a variety of purposes. They monitor our body's systems and check for signs of disease. They also alert us to conditions that may develop into disease, so that preventive changes can be made. Our age, gender, and symptoms influence which tests should be performed.

The Noor Clinic's medical staff will inform about you which tests you need and their purpose. You may be asked to stay after your appointment while results are analyzed, or you may be asked to make a follow-up appointment when the test analysis takes longer.

The Noor Clinic offers many laboratory tests, including:

- Basic Metabolic Panel
- Comprehensive Metabolic Panel
- Chemistry 6
- Chemistry 13
- EKG
- FSBS
- Hemmoccult
- hCG
- Hgb
- HgbA1c
- Lipid Panel
- Liver Panel
- MetLyte8
- Mono
- Renal
- Strep
- TSH (+/_)
- Urine Dip
- WBC
- PT/INR
